UFGL! Learn

CAUTION!

Pay attention to **keywords!** They may lead you to **secret files** in the uni's database that only authorized personnel are allowed to open.

UFGL Database under maintenance

Due to some instability found in our previous server, UFGL will use an alternate system to access students' database, as well as all required information. Students may also access the new server through dedicated repository links, so that everyone can have all available materials at hand.

HELP! Then... How to access it? Take your seat and we'll explain to you.

First of all, the only way to use it is using the root, which is this URL:

“
<https://minhas-anotacoes.github.io/missinger-en/>
”

This structure **will never change**, OK? Do not lose this URL, folks!

How to access pages

To access pages, just add a word after the **/slash** using your favorite browser. As easy as pie!

It's your turn!

Try typing **alex-moreira** after **missinger-en/** and check out the Chemistry course champion's page. Just like this:

“
<https://minhas-anotacoes.github.io/missinger-en/alex-moreira>
”

I wonder if this works with other contestants, too. Who knows? Try out your luck. But watch out for suspicious signs... Remember: **replace-every-space-with-dash**.
